

PHASES & CYCLES®

Olympian Capital Management selects Equity Research from Phases & Cycles

Olympian Capital Management LLC is a specialized money management firm that offers its clients unique multi-strategy investment solutions.

Founded in 2003 and based in Fort Lauderdale, Florida, Olympian's focus is on capital growth, fixed-income and alternative funds that offer investment instruments capable of producing targeted results, while maintaining well-diversified portfolio and risk management. Olympian is pleased to provide personalized solutions and services to its growing base of clients.

Montreal-based Phases & Cycles Inc., founded in 1990, is a significant provider of independent research for North American equity markets. Combining technical, cyclical and sentiment analysis, Phases & Cycles ® publications provide clear and concise information on more than 400 U.S. and Canadian equities.

In the summer of 2010, Michael J. Levas, founder and Chief Investment Officer of Olympian and Ron Meisels, founder and President of Phases & Cycles were guest speakers at an industry event in the city of Toronto. A happy coincidence indeed! Michael listened attentively to Ron's review of market conditions, its key indicators, and to his overall Market Outlook Update message. "Here was someone who knew which components would drive the evolution of the equity markets", continued Mr. Levas. Subsequent to the Toronto event, Suman Mukerji, Phases & Cycles' Sales and Marketing Director, sent Mr. Levas specific samples of Phases & Cycles' research, particularly those related to U.S. equities. "Ron's suggestions and ideas were spot on, and helped me evaluate the depth and quality of the analytical work being done by his team", concluded Mr. Levas. By the end of the summer, Michael Levas was convinced of the value that Phases & Cycles' research would add to Olympian's portfolio management process. Logically, Olympian then decided to proceed and conclude a research agreement with Phases & Cycles.

"We are pleased to have been selected as technical research provider by Olympian Capital Management", confirmed Mr. Meisels. "We provide Olympian with timely and actionable trade and investment ideas related to stocks that we have analyzed. We are delighted to see the positive impact that our work has on the portfolio management process of institutional clients such as Olympian Capital Management", concluded Mr. Meisels.
